III. Starting the software

Connect the clock to your PC with the supplied TYPE-C cable. Double click  **MarvelTubesTool** in software folder. the software will pop up and show as below if the driver is properly installed.

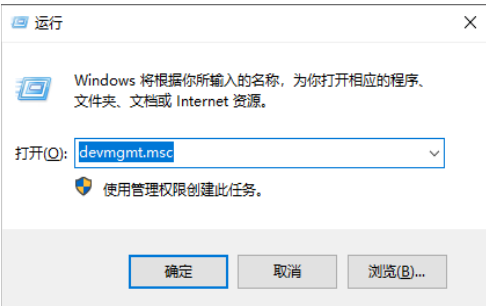

IV. FAQ

If software is stuck at SEARCHING (as shown below), it indicates communication between the clock and PC is not ready. Please check the following:

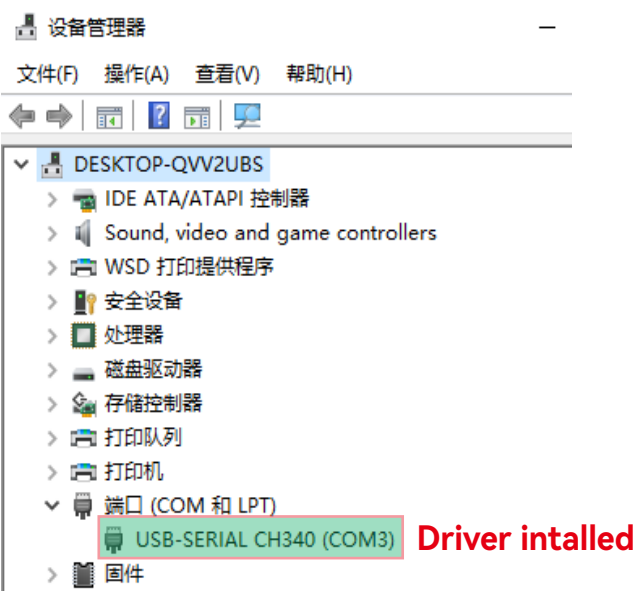

1. Check if driver is installed correctly.

① Run command window by press “Win+R”

② input “devmgmt.msc” and Enter to open the device management.

③ Check as the left image to see if the COM is shown correctly.

2. If the is no COM shown, pls try the followings:

- ① unplug and plug the clock
- ② use a new type-c cable
- ③ reboot your PC

If it still won’t work, contact your dealer for further assistant.
